

EPC Site Warehouse: Inventory Status Report

Date: July 9, 2026

Subject: High-Value Electrical Asset Inventory Review

Project Site: Central Electrical Infrastructure Hub

Please find below the current inventory status for critical high-value electrical components. The "Reorder Needed" status is determined based on the current shortfall against project requirements.

Item ID	Description	Current Stock	Required Qty	Reorder Needed
UPS-500K VA	500kVA Uninterruptible Power Supply	1	3	Yes
SWG-HV-01	High-Voltage Switchgear Unit	2	4	Yes
CBL-CU-185	185mm ² Copper Power Cabling (km)	0.5	2.5	Yes
BRK-MV-05	MV Circuit Breakers (Vacuum Type)	15	20	Yes
CTL-RLY-09	Control Relay/Interface Modules	50	50	No

Notes:

- Items marked "Yes" for reorder require immediate procurement action to maintain project milestones.
- Procurement teams should verify lead times, particularly for the HV Switchgear and UPS units, due to ongoing global supply chain constraints.

Would you like me to draft a procurement request email for these items?
